Roof Exit

Vacate 2 Rooms is the sequel to the original and takes the Escape Room
concept further. The atmosphere is good and I loved the railway ride in the
underground mine. The elevator is also cool. Very claustrophobic feeling!
But the intricacy of the puzzles is where the game really shines.
I would recommend taking your time with this one and not giving up if you
cant figure it out right away. It took me a little longer than I expected to figure it
out but then again I am new to VR escape rooms. I enjoyed myself the whole way through.
The price is fair, especially if you get the bundle. If you like escape room games, this is worth it.

. I liked the first game, but this is too slow. The opening is painfully slow, and the elevator is way too slow. The elevator spins while it ascends and descends, and I think it could make some people feel motion sick. I was working on some puzzles, but, once I realized I was going to have to keep using that slow elevator, I decided this had to be refunded.. This is a REALLY cool game mechanics-wise. The lack of teleportation, but actually being able to physically walk through each room? Insane what it does for immersion. And the rotating elevator is such a cool trick to make the total space feel huge. I found myself saying "that's so \u2665\u2665\u2665\u2665ing cooooool" more than once.
As for the game itself, it's a bit short. But I don't even mind that, I kind of prefer it for a room escape game.
It looks really good graphically, the ambience is great, and it can get quite spooky with the darkness and the isolation.
I liked the puzzles, when the second button panel all came together for me I felt awesome.

And no, I wasn't clever enough to get the roof exit :P
